

Mrs. Sobieszek's Newsletter

February/March 2010

Many things have been happening in our classroom – read on to learn what we have been working on.

Reading:

We are learning about many different animals that are on their way to becoming extinct. How many different endangered species can your child name? Let's see how we can help to ensure these animals will not disappear. We will then be moving on to a new novel study. As we prepare for the I SAT tests, novel studies are a great way to reinforce comprehension and reading strategies.

Math:

Metric conversions are almost over and then we will be moving toward algebraic equations ($a+3=6$ what is a). Then we will be reviewing perimeter, area, angles, lines, rays, etc. As always, remember to practice your math facts.

Science:

We are continuing to learn about weather including air masses, fronts, thunderstorms, and tornadoes. Why don't you have your student watch the weather with you and have them explain all about the different fronts and information on the radar?

Social Studies:

President Washington has helped define a new Cabinet in the White House. Washington, DC is established as the new capital of our new country (the United States). The young United States is trying to become stronger.

Accelerated Reader:

Remember all AR reading should be complete by February 19, 2010 for the 2nd trimester.

Remember: We Are a Fullerton Family! Be safe, be respectful, be responsible.

Dates to Remember

February 4	Blackhawks Day	March 2-12	I SAT Testing Window
	PTA Meeting 6:30 pm	5	Report Cards Go Home
5	Hundred Day Parade 10:30 am	26	Beginning Spring Break
